

HireFlow V2 UI/UX Improvement Roadmap

Executive Summary

Transform HireFlow from an interview demo into a premium AI Interview Intelligence Platform with better UX, analytics, personalization, and engagement.

AI Interview Room

Dedicated interview environment with AI interviewer panel, candidate camera feed, live metrics, timer, and progress tracking.

Real-Time Analytics

Show confidence, eye contact, speaking pace, engagement score, and expression analysis during interviews.

AI Career Coach

Generate personalized feedback, learning plans, improvement suggestions, and career-readiness guidance.

Interview Replay

Replay recordings, review transcripts, view AI feedback timelines, and identify weak moments.

Resume Intelligence Dashboard

Resume score, ATS compatibility, skill extraction, keyword matching, and job readiness metrics.

Personalized Dashboard

User-specific goals, interview history, progress metrics, achievements, and recommendations.

Progress Tracking

Visualize score trends, confidence growth, communication improvement, and technical development over time.

Radar Charts

Display communication, confidence, technical knowledge, leadership, and problem-solving skills.

Premium Micro Interactions

Smooth transitions, loading states, hover effects, success animations, and premium interactions.

AI Avatar Roadmap

Prepare for future AI avatar, lip sync, voice interaction, and visual coaching experiences.

Visual Design Improvements

Full-screen biometric intelligence background, glassmorphism UI, improved typography, spacing, and dark mode.

Priority Roadmap

V2.1: Analytics + Progress Tracking. V2.2: Resume Intelligence + AI Coach. V2.3: Replay + Transcript Analysis. V3: AI Avatar.

Expected Outcome

A premium AI-powered interview intelligence platform comparable to modern SaaS products.
